WATER POLLUTION

When things like that happen, it spreads and when it spreads it goes deep down where the fish are and some fish die!!!!!!

It's fun to ride water things like, jet skies and boats and other things like that, but it can also sometimes leave gas behind it!

Remember to put rubbish in the right bin because if you don't, the wrong things will go into the sea and get stuck on dolphins snout and then the dolphin has a high chance of dying !!!!!!!

It can also happen to seals but in different ways and that also goes for all other sea creatures. When the sea creatures die it also leaves a lot of blood. If the water pollution has not reached another part of the sea yet try to make sure it doesn't happen. If it keeps on going all the sea creatures will die. If all the fish die, there will be no salmon, no tuna, no perch and no cod. When people like to eat sea food, they often go and buy some for dinner, but if there is no sea food they will get a little mad.

Please keep our oceans clean!!!!!!

RECYCLE

Remember, if you have something to recycle put it in a recycle bin or if you have a compost, take it home and put it in. That is good for the worms to dig into and make it into soil. One day you could fill around three bags full of soil. Then, you could put it into your vehicle and drive to a place that you know, and where it has trees

then take the bags out and open one. When there is a hole big enough, start pouring it but not all near the roots of the tree.

Keep doing that over and over on other trees. That way you are not wasting soil and also helping the trees grow. You could also go to a park and do it to the flowers and trees, but don't put too much on the flowers.

REUSE

When you have an empty bottle, don't always put it in a recycle bin, because sometimes kids might want to use it for something. You could make a rocket ship out of a big plastic bottle, or you know when you get packages, you could use that white cardboard thing and make a musical instrument and colour it. You can also get an empty tissue box and rubber bands to make a guitar. Even with an empty McDonalds kids take away box you can make a Jewellery box and put your necklace , your bracelet and earrings in it. If you want to look funny then you could get some cardboard and some coloured see through paper and cut glasses out from the cardboard with the holes, and next glue the see through paper on the inside of the holes and boom, there's your glasses.

I hope you now know how to keep our environment clean!!!!!!!
